DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vainio et al. or Garner in view of Gargouri et al. and further in view of JP 05001297, JP 56015643 or Nagoh et al., Boyer and Oester et al.

Applicant argues that Gargouri teaches that a method for deactivation of one lipase cannot be extrapolated to all lipases. Applicant cites a specific part of Gargouri and says that this provides support for their statement (second column of page 329). What this shows is the difference using different proteins not what is in the claimed method, the claimed method uses tributyrin, for example, not proteins. Thus, the argument is moot. The references clearly establish that it would have been obvious for one of ordinary skill in the art at the time the invention to practice the claimed invention.

Thus, the claimed subject matter is *prima facie* obvious over the cited references.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
